Professional Summary

I am a creative frontend developer with a stronghold on frontend development, its' agile methodologies, tools, and languages. In my 2 years of work experience, I took upon opportunities to develop and maintain user-friendly, efficient, and scalable applications. My thrust for learning and passion for leveraging technologies helped me create, integrate, and deploy new features through the backend. Recently, I got a freehand at contributing towards applications by managing databases, creating APIs, integrating notifications, and AWS for e-mail services. With your organization, I am looking forward to learning from new challenges and peoples to achieve organizational goals.

Work Experience

Frontend Developer at Skoob.ai — Bengaluru, India   Apl 2024 - Present

- **Single-handedly** managing the frontend development and ensuring **seamless interactive user experience** with the application.
- Additional responsibility involves **performing and guiding the team through backend tasks** such as handling data, deploying new features, creating APIs, and integrating notifications.
- Contributed to AI tasks (e.g., AI voice generation and AI content creation).
- **Tech Stack:** ReactNative, Javascript, Xcode, Python, Android Studio, RestAPI, FastAPI, PostgreSQl, gCloud, Docker.

ReactNative Developer at Array Venture Private Limited — Gurgaon, India   Apl 2023 - Feb 2024

- Creating and maintaining a **live quiz application** from the ground level.
- Ensuring smooth user experience and **third-party integration** like payment gateway.
- **Tech Stack:** ReactNative, Javascript, Xcode, Android Studio, RestAPI.

Projects

MindPe   Apl 2023 - Feb 2024

- It involved developing a **live quiz application** and **enabling an interactive user interface.**
- Implementing various features such as a **real-time player, a payment gateway, integration of third-party libraries, code push, refer, and earn functionality.**
- Additional features include **personalized live quizzes** and displaying user ranks on **leaderboards** to enable them to track their performance.

Skoob.ai   Apl 2024 - Present

- Prime responsibility involves building an application where **users can read and listen to stories** of their interest.
- Additional functions include **story handling from the notification bar, and downloading and storing files in the cache.**

Achievements

- Working at a startup, I seized the opportunity to building entire application all by myself while facing challenges and being adaptable in the face of uncertainties.
- With my contribution, the team is able to achieve a remarkable **40% increase in app downloads** and a **2x increase in user retention** at **Skoob.ai.**
- My team was able to increase **user retention by 30%** at **MindPe.**

Skills

Technical Skills

- **Languages:** Javascript(ES6+), Typescript, Python, Java, HTML, CSS.
- **Frameworks:** ReactNative, ReactJs, NodeJs, FastAPI, Docker.
- **Databases:** PostgreSQL, MongoDB.
- **Others:** Android Studio, Xcode, Database Management, RestAPIs, Postman, AWS EC2, GitHub, Data Structures & Algorithms.

Soft Skills

- Communication, Problem Solving, Time Management, Collaboration and Teamwork, Quick learning, and Adaptability.
